

Instructions for our NH Wooden Weather Predictor:

We will need a total of 500 (50 from each county would be great)

Materials needed:

- 1 inch long by 1 ½ inch wide circle of White Birch (NH state TREE)
- 7 inch long piece of twine
- Small amount of glue
- Drill with ¼ drill bit

Drill hole in center of the White Birch.

Fold twine in ½ and insert through the drilled whole, tie a note in the end and glue in spot where twine comes through on the bottom. Also can use white birch larger pieces and cut with 1 ½ inch Hole Saw 1 inch deep. Then glue the white birch bark on to the wood cutting.

Finish with the following: On a 3 ½ x 5 Card

Please use the same manner set up and printing if possible.
