I prefer to receive test results by (Please select only one): Mail Fax Email

Please Note: In order to receive the soil report in the format noted above please make sure that the appropriate information (fax number, email address) has been included.

Sampling Directions

Using a clean spade, take soil randomly from at least 6-8 spots in each garden or lawn area you want tested. Dig down at least 6" for gardens, 6"-8" for trees and shrubs, and 3" for lawns. Mix all the soil together and let it air dry. Remove stones and other large debris, and place 1/2 to 1 cup of dry soil in a clean plastic bag, labeled with a name and sample number (e.g., Front lawn, Sample #1; Vegetable garden, Sample #2.) Make sure you include the sample name(s) and number(s) on the sample sheet you fill out and mail with your sample. If requesting texture class, send 2 cups of soil.

Sample Summary

Number of Samples submitted:	Total Cost \$:
