From I-93 South: Exit 27, right at end of ramp and take next right.

This workshop is sponsored by:

UNIVERSITY of NEW HAMPSHIRE
COOPERATIVE EXTENSION

Wetland Identification and Delineation for Foresters

The purpose of this workshop is to give foresters the tools they need to identify and delineate wetlands with a special emphasis on "the gray areas" (forested wetlands that just seem wet). The purpose also is to help foresters do a better job determining whether or not a minimum notification or some other permit is needed when conducting forest management activities.

Indoor morning session

Wetland Delineation 101 – Mark West

- Overview of wetlands identification- the three wetland parameters (plants, soil, hydrology)
- Use of existing info for beginning a delineation, including NWI's and aerial photo interpretation
- Plants- wetland indicator status of some common wetland plants
- Field collection of data- doing plots to determine a wetland

Wetland Soils- Joe Homer

- Recognizing wetland soils using field characteristics (color, texture, etc)
- Regional and national hydric soil indicators
- Using soil maps and Web Soil Survey to identify and delineate wetlands

Wetland Regulations and Forestry Practices

– Linda Magoon

- Overview of related forestry wetland regulations including changes in the stream crossing rules
- Determining watershed size
- Prime wetlands- purpose, identification, and specific regulations associated with prime wetlands

Pizza Lunch Provided

Outdoor session (after lunch)

- Review of the 3 parameters for delineating wetlands
- Wetland delineation in groups
- Review a wetland crossing and its permitting
- Discuss prime wetland protection and buffers

Presenters:

Joe Homer, Assistant State Soil Scientist, USDA Natural Resources Conservation Service
Linda Magoon, N.H. Department of Environmental Services-Wetlands Bureau
Mark West, Wetland Scientist, West Environmental, Inc
