

# “LOGS TO LUMBER”

*Come watch Mr. Hank Somero, a professional Sawyer, as he mills logs into lumber.*

*This is a unique educational experience for all ages! Come see how a master craftsman creates milled lumber. The event is open to all! Bring water, bug spray and a good pair of sturdy walking shoes, as there is a slight walk to gain access to the site.*

*If you wish to help with a project on Saturday, The Friends of Grater Woods will be using the newly milled lumber, cut from the Grater Woods Town Forest, to build the seating area for the Outdoor Education Center. Saturday will be hands on. Bring a good set of working gloves...all help is both encouraged and welcomed!*
