## Participating in Map@Syst

Map@Syst is a collective of outreach specialists and users of geospatial technologies. The participants of this group are from states throughout the country and have expertise in a range of geospatial applications, including but not limited to urban planning, natural resource conservation and economic development. This group works together under the umbrella of eXtension, a national effort of the Cooperative Extension System to provide a peer-developed, collaborative web-based storefront for Extension materials and expertise.

### Why would I want to participate in Map@Syst?

Map@Syst **brings together** geospatial **outreach specialists** and **practitioners** with expertise in a range of geospatial applications

Map@Syst is made up of **like-minded geospatial professionals** ready to **collaborate**

Map@Syst provides a mechanism for **getting feedback** and **sharing information** about your geospatial **applications and projects**

Map@Syst makes a **projects, proposals** and **grants more competitive** through a **nationally-recognized** collaboration

### How can I participate in Map@Syst?

- ==> provide suggestions on the direction of Map@Syst efforts
- ==> get feedback and support on your own geospatial technologies project
- ==> serve as a peer-reviewer or editor for articles or news submitted by members
- ==> contribute articles on the use of geospatial technologies in your field
- ==> answer "Ask the Expert" questions from end users throughout the US
- ==> attend monthly virtual workgroup sessions and annual face-to-face content development meetings

*While Map@Syst was founded by university outreach specialists, we actively seek participation in the group from geospatial practitioners from all sectors and disciplines. The greater the range of experience and expertise in our group, the stronger Map@Syst will become.*

To find out more about participating, contact the Map@Syst leadership
