I prefer to receive test results by (Please select only one): Mail Fax Email

Please Note: In order to receive the soil report in the format noted above please make sure that the appropriate information (fax number, email address) has been included.

Sampling Directions

Take soil samples with care. If the sample is not representative of the area, the test results and lime and fertilizer recommendations will be of no value! Take samples from 10-150 locations in the tunnel, mix well, air dry, remove stones and other debris, and submit 1 cup of dry soil for testing. Sample from 6-8" deep. Name each sample and label each bag clearly (e.g. "New Tunnel", "Big Tunnel", etc.)
