UNH Cooperative Extension's Mission

UNH Cooperative Extension provides New Hampshire citizens with research-based education and information, enhancing their ability to make informed decisions that strengthen youth, families and communities, sustain natural resources and improve the economy.

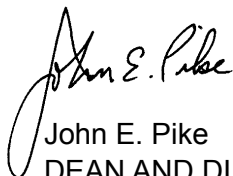

Helping you put knowledge and research to work in New Hampshire

UNH Cooperative Extension extends the University's knowledge and research directly to people and communities throughout the state. Cooperative Extension has field offices and professional staff in all ten New Hampshire counties, backed by specialists on the UNH campus in Durham and an educational outreach center at UNH-Manchester. Extension Educators work with people at the local level to address needs and issues related to youth and families, community strengthening, environmental stewardship, natural resources management and related industries.

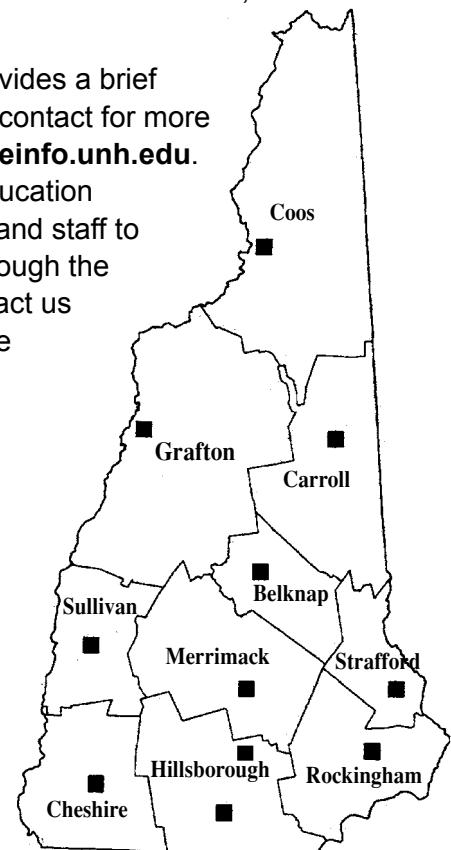

Extension's work is accomplished through the application of research-based information, the involvement of UNH faculty and students, and use of other UNH resources. Cooperative Extension is known throughout the state and well-positioned to facilitate even greater access for New Hampshire residents to their Land, Sea and Space-Grant institution.

This directory of Cooperative Extension programs provides a brief description of current initiatives and the individuals to contact for more information. It can be accessed via our web page at ceinfo.unh.edu. Besides serving the public through use of distance education technology, Cooperative Extension links UNH faculty and staff to the full-range of expertise and resources available through the national Cooperative Extension System. Please contact us if you would like to learn more about UNH Cooperative Extension's many programming efforts to assist individuals, families, businesses, organizations and communities.

Sincerely,

John E. Pike
DEAN AND DIRECTOR
UNH COOPERATIVE EXTENSION

Strengthen New Hampshire Communities

UNH Cooperative Extension is uniquely positioned to help communities

- foster community-based approaches
- plan for sustainability and balanced growth
- facilitate leadership development
- promote community decision-making and community dialogues
- implement strategies to increase citizen involvement and leadership
- develop and implement action plans to address priorities
- engage in dialogue around public issues to enhance decision-making.

UNH Cooperative Extension can support the thoughtful community-level planning needed to protect the rich natural environments vital to keeping New Hampshire's identity intact, economy strong, and quality of life high.

Community Profiles

Community Profiles enables communities to take stock of where they are today and develop an action plan for the future. It provides a method for citizens to affirm community strengths, to meet challenges creatively through collaboration, and to manage change.

To learn more, contact

Michele Gagne, Program Coordinator, Strengthening NH Communities at 862-5046 or email michele.gagne@unh.edu

Community Conservation Assistance Program

A program aimed at helping communities around the state inventory important natural resources and implement programs to conserve them.

To learn more, contact

Amanda J. Lindley Stone, Community Conservation Assistance Program Coordinator, 364-5324 or email amanda.stone@unh.com

Frank Mitchell, Extension Specialist, Land & Water Conservation, 862-1067 or email frank.mitchell@unh.edu

Phil Auger, Extension Educator, Forest Resources, 679-5616 or email phil.auger@unh.edu

Karen Bennett, Extension Specialist, Forest Resources, 862-4861 or email karen.bennett@unh.edu

Natural Resources Senior Project Course

The Natural Resources Senior Project Course is a joint effort of UNH Cooperative Extension and the UNH Natural Resources Dept. that strengthens both organizations' abilities to achieve their educational goals. It engages UNH students in community environmental projects selected from proposals from New Hampshire municipalities and non-profit organizations, with direct guidance from Extension professionals, who also directly assist the communities at their request. Projects include natural resource inventories, watershed studies, wetlands evaluations, and water quality monitoring.

To learn more, contact

Frank Mitchell, Extension Specialist, Land & Water Conservation, 862-1067 or email frank.mitchell@unh.edu

Nancy Lambert, Extension Specialist, Natural resources 862-4343 or email
nancy.lambert@unh.edu

Preserving Rural Character Through Agriculture

A cooperative effort between Cooperative Extension and The New Hampshire Coalition for Sustaining Agriculture to assist communities determine if they are agriculture-friendly. Each NH Community is receiving a “kit for local planners” that provides a checklist and suggestions for developing agriculture-friendly land use controls.

To learn more, contact

Nada Haddad, Extension Educator, Agricultural Resources, 679-5616 or email
nada.haddad@unh.edu

Community Youth Development

Together with local youth, parents, community leaders and organizations, Cooperative Extension helps foster environments that encourage engagement to create positive change and build communities that value and support youth. Community-based initiatives include coalition development, support and connection; community development related to critical youth and family issues; strategic planning and community youth profiles; building protective factors that support the positive development of youth; knowledge building in the areas of positive youth development; family involvement; community service learning and civic engagement; asset mapping; and quality out-of-school programs.

To learn more, contact

Charlotte Cross, Extension Specialist, 4-H Youth Development, 862-2495 or email
charlotte.cross@unh.edu

Paula Gregory, Extension Specialist, 4-H Youth Development, 862-2909 or email
paula.gregory@unh.edu

Urban and Community Forestry

Communities, people in inner-city neighborhoods, natural resource professionals, organizations, municipal officials and their workers are provided with education, technical information, workshops and assistance on developing and implementing plans and projects to protect and enhance their community character and natural environment. A Community Tree Steward Volunteer Program expands Extension’s ability to reach into neighborhoods and communities around the state. This is a joint program with the NH Division of Forests and Lands and USDA Forest Service.

To learn more, contact

Karen Bennett, Extension Specialist, Forest Resources, 862-4861 or email karen.bennett@unh.edu

Mary Tebo, Hillsborough County Community Forestry Educator, UNH – Manchester, 629-9494, ext. 140 or email mary.tebo@unh.edu

Volunteers

Volunteers help in the development and implementation of programs to meet the needs of New Hampshire residents and communities. Extension invests in volunteers by providing training and support. Volunteers in turn invest their time in service to others. Extension multiplies its educational efforts by using trained volunteers as educators, middle managers and as resource people.

To learn more, contact

Wendy Brock, Program Leader, 4-H Youth Development, 862-2187 or email
wendy.brock@unh.edu

Deb Cheever, Extension Educator, 4-H Youth Development, 225-5505 or email
deborah.cheever@unh.edu

Youth

The 4-H Youth Development Program incorporates the valuable life skills of volunteering and responsible citizenship, while also teaching other life skills. Through a combination of one-time and ongoing projects, youth and adults work in partnership to provide service to their communities.

To learn more, contact

Wendy Brock, Program Leader, 4-H Youth Development, 862-2187 or email
wendy.brock@unh.edu

Strengthen New Hampshire's Family and Youth

Well-regarded for its expertise in family strengthening programs covering parenting, youth development, financial management, nutrition and food safety, Cooperative Extension has tested and proven innovative techniques to address complex youth and family issues.

Community Solutions for Children, Youth and Families At-Risk

Working in partnership with local youth, parents and community leaders, resources are brought together in programs to encourage positive outcomes for at-risk youth and families. Community solutions includes coalitions, after-school programs, family resource centers, and parent education and support programs.

To learn more, contact

Paula Gregory, Extension Specialist, 4-H Youth Development, 862-2909, or email
paula.gregory@unh.edu

Family Resource Management

Family Resource Management's goal is to enhance individual and family economic well-being. This is achieved through skill-building education in financial management, spending and savings plans, credit and debt, and setting financial goals.

Family Lifeskills Program consists of a multi-disciplinary curriculum that increases self confidence, social supports, and personal and family skills necessary for a successful transition from public assistance to work. The program is a New Hampshire Employment Program job readiness activity administered by the NH Department of Health and Human Services, Division of Family Assistance.

To learn more, contact

Suzann Enzian Knight, Extension Specialist, Family Resource Management, 862-0092 or email
suzann.knight@unh.edu

4-H Youth Development

4-H Youth Development is the youth program of Cooperative Extension. It engages youth and adult volunteers, 4-H Clubs, special interest groups and 4-H after school programs. 4-H Youth Development programs include Animal or Plant Science, Family and Consumer Science, Com-

puter Science and Technology, Environmental Science, Leadership Development, and Career Exploration. Community youth development and life skill development are central to the mission.

To learn more, contact

Lisa Townson, Extension Specialist, 4-H Youth Development, 862-1031 or email lisa.townson@unh.edu

4-H Camps

4-H Camps offer inclusive summer camping and recreational opportunities for all youth, emphasizing development of the individual camper's life skills: communication, decision-making abilities, independence, social skills, accepting differences, health and fitness, problem solving, teamwork, and cooperative group living. Opportunities for employment, volunteering, internships and research are available for UNH faculty and students.

To learn more, contact

Chris Conlon, Camps Manager, 4-H Youth Camps, 862-2184 or email chris.conlon@unh.edu

Nutrition Education and Food Safety

Nutrition is an important component of overall health. UNH Cooperative Extension works throughout the state to provide nutrition education and food resource management through direct teaching, newsletters, the media and collaboration with numerous local and state agencies. Extension also provides all sectors of the food system, from producers, processors and the food service industry to consumers, with education on food safety and sanitation. Food safety programs help participants keep food safe by assessing risk and using recommended food handling techniques to minimize the risk of food-borne illness.

To learn more, contact

Catherine Violette, Extension Specialist, Food & Nutrition, 862-2496 or email catherine.violet@unh.edu

Valerie Long, Extension Specialist, Food & Nutrition, 862-2495 or email valerie.long@unh.edu

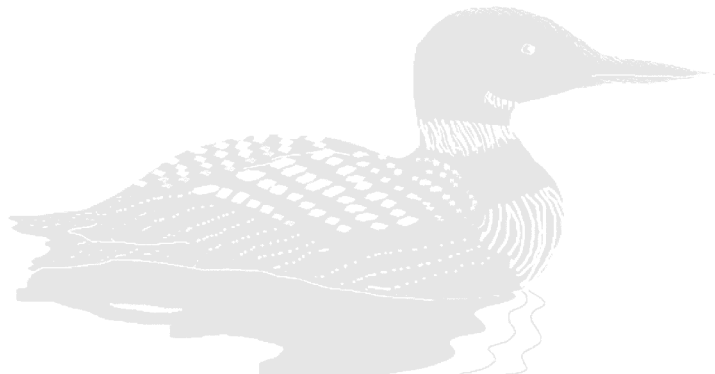

Colette Janson-Sand, Associate Professor & Extension Specialist, Food & Nutrition, 862-1723, or email chjs@cisunix.unh.edu

Parenting Education and Training for Child Care Providers

Families across New Hampshire want to do what's best for their children. Our parenting education focuses on helping parents learn skills to motivate their children to achieve and develop into mature, responsible adults.

To learn more, contact

Extension Specialist, Family Life. 862-1928

Sustain New Hampshire's Natural Resources

New Hampshire's natural resources make this state one of the most beautiful and desirable in the country. Through a diverse offering of workshops, publications and other methods, UNH Cooperative Extension's programs focus on wise management and use of these natural resources.

Agroecology

A collaborative team effort involving Cooperative Extension Educators and UNH researchers to enhance the economic and environmental sustainability of agronomic cropping systems in New Hampshire.

To learn more, contact

Tom Buob, Extension Educator, 787-6944 or email tom.buob@unh.edu

Coastal and Estuarine Pollution Control

Supported by UNH/NOAA Cooperative Institute for Coastal and Estuarine Environmental Technology (CICEET), these programs provide information on ways to reduce water pollution from home and community landscapes.

To learn more, contact

Julia Peterson, Extension Specialist, Water Resources, 749-1565 or email julia.peterson@unh.edu

Dairy Management

Provides production and research information to commercial and part-time dairy cattle and goat farmers.

To learn more, contact

Peter Erickson, Extension Specialist, Dairy Mgmt. & Nutrition, 862-1909 or 225-5505 or email peter.erickson@unh.edu

Michal Lunak, Extension Specialist, Dairy, 787-6944 or email michal.lunak@unh.edu

John Porter, Extension Specialist, Dairy (Animal housing, goats), 796-2151 or email john.porter@unh.edu

Discovery Cruises

These "hands-on" cruises aboard the UNH research vessel, Gulf Challenger, offer participants the opportunity to learn about on-going marine research and oceanographic concepts either in Great Bay or at the Isles of Shoals.

To learn more, contact

Julia Peterson, Extension Specialist, Water Resources, 749-1565 or email julia.peterson@unh.edu

Forest Industry

Technical and educational information and assistance is provided to NH's forest industry and to local and state-level economic development practitioners about forest industries and expansion opportunities. Coordinates with UNH Thompson School of Applied Sciences and NH Timberland Owners Association to implement the NH Professional Logger Program.

To learn more, contact

Sarah Smith, Extension Specialist, Forest Industry, 862-2647 or email sarah.smith@unh.edu

Forest Resources

Forest stewardship information and educational programs for landowners, natural resource professionals and communities are provided through one-to-one site visits, workshops, seminars, field sessions, web site and publications. This is a joint program with the NH Division of Forests and Lands.

To learn more, contact

Karen Bennett, Extension Specialist, Forest Resources, 862-4861 or email karen.bennett@unh.edu

Fruit Production and Management

Assists growers of tree fruit and berries in achieving economic and environmental sustainability and in providing consumers locally grown, high quality and healthful fruit.

To learn more, contact

William Lord, Extension Specialist, Fruit Crops, 862-3203 or email william.lord@unh.edu

Geospatial Applications Training

A diverse set of programs and courses for teachers, communities, agency representatives, and the public designed to increase the understanding and use of mapping-related technologies.

To learn more, contact

Nancy Lambert, Extension Specialist, Natural Resources, 862-4343 or email nancy.lambert@unh.edu

Great Bay Coast Watch (GBCW)

Nearly 100 GBCW volunteers monitor water quality, perform shoreline surveys, and discern pollution sources in Great Bay and other coastal locations around New Hampshire.

To learn more, contact

Ann Reid, Extension Program Associate, Water & Marine Resources, 749-1565 or email ann.reid@unh.edu

Integrated Pest Management

Assists farmers to effectively handle pest problems while reducing the use of chemical pesticides, minimizing production costs, and maintaining crop quality and yield.

To learn more, contact

Alan Eaton, Extension Specialist, IPM, 862-1734 or email alan.eaton@unh.edu

Lakes Lay Monitoring Program (LLMP)

This is a volunteer water quality monitoring program consisting of 500 volunteers who monitor 300 lake and pond sites, and 275 stream sites in 130 lake watersheds across the state.

To learn more, contact

Jeffrey Schloss, Extension Specialist, Water Resources – LLMP, 862-3848 or email jeff.schloss@unh.edu

Livestock Production

Delivers research-based education and information to livestock producers through a team of Extension Educators.

To learn more, contact

Bruce Clement, Program Leader, Agricultural Resources, 862-2033 or email bruce.clement@unh.edu

Marine Docent and the Sea Trek Program

Marine Docents receive extensive training in all aspects of marine science and participate as volunteers in the delivery of Sea Grant and Extension marine education program to students, teachers, and the general public throughout the state.

To learn more, contact

Sharon Meeker, Extension Specialist, Marine Education, 749-1565 or email sharon.meeker@unh.edu

Ornamental Horticulture

Provides production, marketing, and management assistance to greenhouse, nursery, outdoor cut flower, and perennial growers, as well as retail garden centers and landscape professionals.

To learn more, contact

Catherine Neal, Extension Specialist, Ornamental Horticulture, 862-3208, or email cathy.neal@unh.edu

Pesticide Education

The pesticide applicator training program, conducted by Extension Educators and Specialists, is responsible for training and re-certification of all private and commercial pesticide applicators.

To learn more, contact

Rachel Maccini, Family, Home and Garden Education Center Coordinator, 629-9494 or email rachel.maccini@unh.edu

Plant Health

Educational programs in plant health including the plant pathogens, pests and disorders. The UNH Plant Diagnostic Laboratory provides diagnostic services for identification of plant health-related problems.

To learn more, contact

Cheryl Smith, Extension Specialist, Plant Health, 862-3841 or email cheryl.smith@unh.edu

Sea Trek, Marine Education and Outreach Programs

Sea Trek, marine education and outreach programs offered by UNH Marine Docents (volunteers) to schools, civic groups and the public, these programs focus on marine science and coastal issues. They include classroom activities, Discovery Cruises, Floating Labs, and Days of the Coast. Tours of Jackson Estuarine Laboratory are also offered.

To learn more, contact

Sharon Meeker, Extension Specialist, Marine Education, 749-1565 or email sharon.meeker@unh.edu

Sustainable Agriculture

Encourages an integrated system of plant and animal production practices which are environmentally sound, economically viable and socially acceptable with emphasis on recognition of agriculture as an important part of NH's communities and economy.

To learn more, contact

Seth Wilner, Extension Educator, Agricultural Resources, 863-9200 or email seth.wilner@unh.edu

Turf Production and Management

Assistance to turf grass producers and professional turf managers in best management practices for production and pest control

To learn more, contact

John Roberts, Extension Specialist, Turf Management, 862-3202 or email john.roberts@unh.edu

Stanley Swier, Extension Specialist, Entomology, 862-1733 or email stanley.swier@unh.edu

Vegetable Crop Production

Assistance in intensive production, marketing and business management for growers of vegetable crops.

To learn more, contact

George Hamilton, Extension Educator, Agricultural Resources, 673-2510 or email george.hamilton@unh.edu

Water Quality/Nutrient Crop Management

Develop, demonstrate and implement practices which will minimize the risk of surface and groundwater contamination from nutrients and pesticides, and encourage voluntary stewardship.

To learn more, contact

Thomas Buob, Extension Educator, 787-6944 or email tom.buob@unh.edu

Wildlife

Wildlife habitat education and outreach for landowners, natural resource professionals, and communities is provided through workshops, seminars, field sessions, publications and volunteers in the NH Coverts Program. This is a joint program with the NH Department of Fish and Game.

To learn more, contact

Darrel Covell, Extension Specialist, Wildlife, 862-3594 or email darrel.covell@unh.edu

Improve New Hampshire's Economy

Aquaculture

Aquaculture Extension programs are designed to help both prospective and existing marine and freshwater operations with all aspects of business development, including technical information, site and species selection, and marketing.

To learn more, contact

J-J Newman, Extension Specialist, Aquaculture, 749-1565 or email jj.newman@unh.edu

Business Management/Marketing

Assistance to agricultural and natural resource-based firms in economic analysis and budgeting, business and market planning, financial analysis and estate planning.

To learn more, contact

Michael Sciabarrasi, Extension Specialist, Agricultural Business Management, 862-3234 or email mike.sciabarrasi@unh.edu

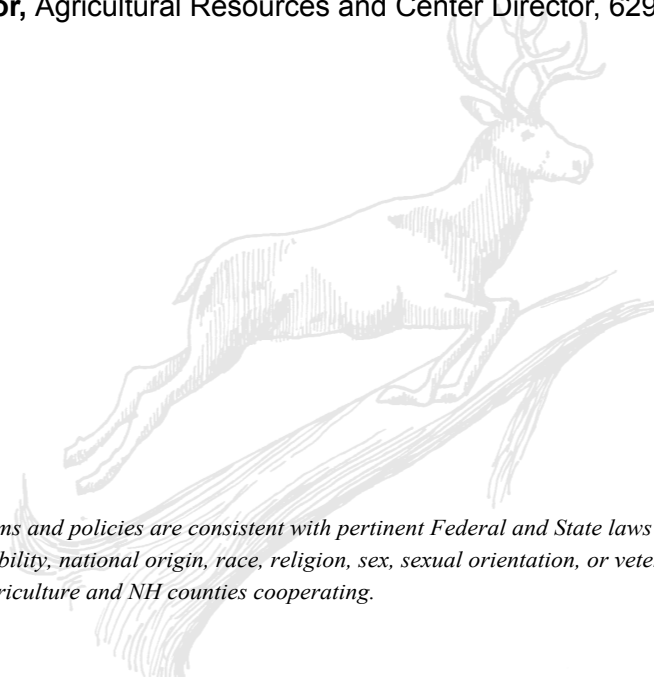

Related UNH Cooperative Extension Efforts

Family, Home & Garden Education Center

The Family Home & Garden Education Center at 200 Bedford Street in Manchester provides practical solutions to everyday questions for the citizens of New Hampshire. It is staffed by professional and intensively trained volunteers who can answer questions about gardens, lawns and landscapes, household food safety and food preservation, water quality, integrated pest management, free planting and care, backyard livestock and more. We offer written information, programs or referrals on family finances, nutrition, parenting and child development, and 4-H youth development. Call our toll-free Info Line M-F from 9 am to 2 pm at 1-877-398-4769 to ask about other resources

To learn more, contact

Margaret Hagen, Extension Educator, Agricultural Resources and Center Director, 629-9494 or email margaret.hagen@unh.edu

University of New Hampshire Cooperative Extension programs and policies are consistent with pertinent Federal and State laws and regulations on non-discrimination regarding age, color, disability, national origin, race, religion, sex, sexual orientation, or veteran's status. University of New Hampshire, U.S. Department of Agriculture and NH counties cooperating.
