

## Exam information:

In order to start the examination process leading to licensing, a written examination is required and has to be scheduled. All applications and fees must be submitted prior to the exam date. Exams are held most Fridays and must be scheduled in advance. The examination will consist of at least three separate exams, general core, rules and regulations and category(ies). These exams are written, closed-book exams with a passing score of 70 percent for supervisory candidates and 60 percent for operational on each individual exam. A careful reading of the Laws and Regulations and other study materials pertinent to your categories will be very helpful in preparing for the examination.
