Structural Pest Control Training

UNH Cooperative Extension will host an all-day Structural Pest Control Training for individuals in the field of Urban IPM. This course is being offered for the first time to address the continuing educational needs of the Urban IPM community and will be conducted by Urban IPM professionals.

This event will present content on: Principals of Urban IPM, Current Topics in Pest Management, Pest Problems after Storms and Other Disasters, Rodent Management, and Bedbugs and Their Resurgence. Hands-on training is to be provided in an Insect Identification Lab, equipped with microscopes and hand lens, to help professionals identify key pests found in NH residences based on anatomical features.

For any special arrangements including physical access, please contact Rachel Maccini, Pesticide Safety Education Coordinator at 603-351-3831. Ten working days are needed to facilitate special needs requests.

The University of New Hampshire Cooperative Extension is an equal opportunity educator and employer. University of New Hampshire, U.S. Department of Agriculture and N.H. counties cooperating.
