The Tree Work Contract

A contract is the key to preventing misunderstandings and assuring the work is performed to the standards you expect. Most companies have their own forms, and conditions vary widely. Read the document carefully and check with your attorney if you have questions.

There are several key items a contract should include:
1) The name and physical address of the contractor.
2) The date that work is to begin and end.
3) Exactly what work will be done. For example, “Prune all dead, dying, diseased and weak branches 1.5 inches or greater in diameter.”
4) Specify the work will be done according to an acceptable standard (see tree work standards box).
5) If your tree is to be sprayed, get a written statement detailing the specific insect or disease to be treated; the chemical to be used and how much; and what you need to do (cover lawn furniture, keep pets inside…) Confirm they have a commercial pesticide applicator license.
6) If fertilizing is to be done, specify type, amount and method of application. Provide a rough map of the property, identifying trees to be serviced, or a clearly written description of location.
7) Specify what clean–up work will be done and when.
8) Clarify who will get firewood, wood chips, or other materials. If it is for you, specify what length you want and where it should be piled.
9) Clarify if removal of tree includes grinding out the stump and surface roots to one foot below grade, filling with topsoil and planting grass.
10) Specify all state and local laws will be followed.
11) What is the absolute total dollar amount you will be charged? Leave no room for confusion over whether the price is per tree or for the whole job. Work is usually priced as a single fee for the whole job or on an hourly basis plus materials. When using the latter, include the wording, “but not to exceed…”

Tree Work Standards
