

Steve Eisenhaure, Land Use Coordinator, Office of woodlands and Natural Areas, University of New Hampshire, Kingman Farm, Durham, NH 03824, 603-862-3951, Stephen.Eisenhaure@unh.edu

Steve Eisenhaure has an A.A.S. in Forestry Technology, B.S. in Business Administration, and M.S. in Forestry all from the University of New Hampshire. The pathway to a career in forestry began as a Wildland Firefighter in Idaho and has led to the current position as Land Use Coordinator for the University of New Hampshire. This position involves managing the University Woodlands and teaching a Forest Measurements class for the Thompson School Forest Technology program. Favorite parts of the job include collaborating with researchers on new challenges related to forest management, like invasive plants, and the hands-on parts of land management, including logging and trail-work. Interests outside work include spending time with family, fly fishing and making firewood.

Steve is a co-authored the following publication:

Lee, T.D., S.E. Eisenhaure, I.P. Gaudreau. 2016. Pre-logging treatment of invasive glossy buckthorn (*Frangula alnus* Mill.) promotes regeneration of eastern white pine (*Pinus strobus* L.). *Forests* 8, 16; doi:10.3390/f8010016.
