Taking Action for Wildlife is a collaboration between UNH Cooperative Extension, NH Fish and Game and the NH Association of Conservation Commissions to assist communities, conservation organizations and landowners in conserving wildlife and habitats in New Hampshire. The website includes information on conducting natural resource inventories, conservation planning, habitat management and much more. The program also provides direct technical assistance on these topics to communities and land trusts. Learn what actions you can take to help wildlife in NH and beyond. <https://takingactionforwildlife.org/>

UNH Cooperative Extension has programs to assist with forestry, wildlife, land protection and stewardship, coastal resources, climate change and more. <https://extension.unh.edu/topics/natural-resources>

NH Association of Conservation Commissions Has services for conservation commissions. <http://www.nhacc.org/>

NH Natural Heritage Bureau tracks records of rare animals, plants and natural communities. <http://www.nhdfi.org/about-forests-and-lands/bureaus/natural-heritage-bureau/>

NH GRANIT New Hampshire's statewide GIS clearinghouse. <http://www.granit.unh.edu/> NH GRANIT View is a free web based mapping tool. <http://granitviewii.unh.edu/>

Dirt to Trees to Wildlife includes a mapping program and other information on habits management for species. The DTW Mapper analyzes mapped soils in a given project Area of Interest (AOI)—such as an entire woodlot or forest stand(s)—to identify potential forest types expected to occur within each soil type. Forest types are then related to preferred breeding habitat for New England wildlife, and lists of those wildlife species are provided. The output lists soils, potential forest types, acreages, and forest management recommendations and wildlife species lists and links to more information for each Species of Greatest Conservation Need (SGCN) as designated in at least one New England state Wildlife Action Plan. Users can also produce project maps to accompany the output report. <https://dirttreeswildlife.org/>
