

NEW HAMPSHIRE FOREST MARKET REPORT 1959

The stationary sawmill efficiently operated provides a good and continuing market for logs from hundreds of small New Hampshire woodland holdings.

COOPERATIVE EXTENSION SERVICE
UNIVERSITY OF NEW HAMPSHIRE
DURHAM, N. H.

in cooperation with the
STATE FORESTRY AND RECREATION COMMISSION

The information in this bulletin was gathered by New Hampshire County Foresters, and the bulletin was written by K. E. Barraclough, Extension Forester, and Roger P. Sloan, County Forester, Rockingham County.

FOREST MARKET REPORT

1959

THE FOREST MARKET SITUATION*

The economic welfare of the forest industry is closely tied to the economic health of the general community. Recent recovery in business suggests a favorable outlook for industrial roundwood products during 1959.

The volume of industrial roundwood (all round timber products except fuelwood) produced in the United States in 1958 is estimated at 8.6 billion cubic feet. This is about 2 percent less than the estimated production in 1957 and 10 percent below production in 1956. Stumpage prices showed a steady decline in 1957 and the first two quarters of 1958.

The drop in the production of industrial roundwood and stumpage prices has been related to a general decline in economic activity. During the latter part of 1958 and starting with 1959, industrial production, employment, and income increased. Housing starts, the most important source of demand for lumber, reached the highest rate since the summer of 1956. This brightening economic outlook has already reflected a rising demand for industrial roundwood products such as sawlogs, veneer logs, and pulpwood.

SAWLOGS AND LUMBER - - The volume of sawlogs and lumber produced nationally in 1958 is estimated at 33.0 billion board feet. This is about 2 percent less than production in 1957 and 12 percent less than production in 1956. The West is expected to account for about 54 percent of total production, the South 33 percent, and the North 13 percent.

In contrast to the sharp decline in production, sawlog price quotations have shown little change in recent years.

The drop in sawlog and lumber production reflects a decrease in economic activity and continuing substitution of other materials for lumber--including both wood items such as plywood and paper board and non-wood materials. The long-term outlook; nevertheless, indicates expanding markets for sawlogs and lumber along with rising levels of construction and business activity. The demand for sawlogs by New Hampshire operators improved at the start of 1959.

Since 1956 the price of lumber has declined about 11 percent while the price of most of the materials that compete with lumber have been increasing. This divergence in prices has presumably improved the competitive position of lumber and if continued should tend to slow the rate of substitution of other materials for lumber.

*"The Demand and Price Situation for Forest Products", U. S. Forest Service and Commodity Stabilization Service, U. S. Department of Agriculture, November, 1958.

PULFWOOD - - Pulpwood production in 1958 is estimated at 33.5 million cords including about 4 million cords of residues. This is about 3 percent below production in 1957 and 5 percent below the peak year 1956.

Softwoods such as southern pine, western hemlock, douglas-fir, spruce, and true firs are expected to make up about 82 percent of the pulpwood produced in 1958. About 57 percent of the pulpwood cut in 1958 will come from the South, 22 percent from the West, and the remaining 21 percent from the forests in the North.

The decrease in pulpwood production since 1956 marks what is believed to be a temporary reversal in a trend that has been sharply upward for many years. There are a variety of forecasts made by different agencies which indicate that the demand for pulpwood in the United States is likely to increase rapidly. The U. S. Forest Service has estimated that the demand for pulpwood in 1975 may be between 45 and 65 percent higher than 1956. The demand for pulpwood by the New Hampshire pulp industry started to improve early in 1959.

VENEER LOGS - POLES - PILING - - The volume of veneer logs produced in 1958 is estimated at 3.5 billion board feet. Although total veneer log production has shown little change since 1956, there has been some increase in softwood veneer log production and a small decline in hardwood veneer log production.

The outlook for veneer logs is highly favorable. Demands for softwood veneer logs because of continued substitution of softwood plywood for lumber, particularly in residential construction, are likely to increase more rapidly than demands for hardwood veneer logs.

The demands for poles and piling have followed the same trend as the demand for other forest products. By the end of 1958 the market for poles and piling was active.

CHRISTMAS TREES - - The use of Christmas trees in the United States has been rising slowly and the consumption is now in excess of 40 million trees annually, including about 28 million produced in domestic forests and 12 million imported from Canada. Stumpage prices paid the Christmas tree producers vary widely ranging from as low as 10 cents per tree for wild trees to \$4 or more for plantation grown trees.

The relatively high prices paid for plantation grown trees have resulted in large increases in Christmas tree plantings. This has advanced to the point that recent surveys in Michigan, Ohio, and Pennsylvania show that total Christmas tree plantings in these three states alone amount to 20 million trees a year. This high volume of planting suggests the possibility of sharply increased competition for available markets. The market for Christmas trees during the 1958 season was much improved as compared with the 1957 season. Producers were more careful in putting trees on the market and adverse weather conditions kept the supply of trees more in balance with the demand.

THE NEW HAMPSHIRE SITUATION - - The national demand for forest products reflects fairly well the market for New Hampshire roundwood. During the first part of 1958 there was limited activity. During the fall and early winter of 1958 and starting with 1959 the market was mixed. There was an active demand for pine stumpage for lumber. Early in 1958 hardly any hemlock was moving and then suddenly the demand for hemlock stumpage became active. The demand for poles and piling had improved by the end of 1958. It was difficult to move hardwood stumpage unless it was of veneer quality in sufficient quantity to justify a commercial operation. The market for pulpwood by the close of 1958 was very slow. Early in 1959 the demand for pulpwood became more active.

The prices offered for stumpage during 1958 have shown considerable variation. Looking ahead stumpage owners need to recognize the importance of selling stumpage when the market is sufficiently active so as to bring reasonable offers for their trees on the stump. If the predictions of business activity in 1959 as compared with 1958 are correct there is every indication that the increased demand for roundwood during the early months of 1959 will continue through the year.

The annual income from forest products in a state with approximately 85 percent of its land area in trees is important to the general welfare of the people. The following table shows the estimated market value of forest products and farm crops harvested by states in the northeast for the year 1954.*

"ESTIMATED MARKET VALUE OF FOREST PRODUCTS
AND FARM CROPS HARVESTED BY STATES."

(Thousand of Dollars)

States	(1) Market Value of forest products Harvested	(2) Market Value of farm crops Harvested
Maine	56,900	90,854
New Hampshire	18,600	18,197
Vermont	19,600	48,969
Massachusetts	4,400	55,138
Rhode Island	200	5,466
Connecticut	1,400	58,935
New York	33,200	363,136
New Jersey	3,500	110,641
Pennsylvania	39,300	353,820
Total	177,700	1,105,156

(1) Value of logs and bolts, Christmas trees, and maple sap at local points of delivery.

(2) Includes the value of 79 crops harvested. See 1956 Agricultural Statistics, Page 461, for list of crops included.

* "The demand and Price Situation for Forest Products" U.S. Forest Service and Commodity Stabilization Service, U. S. Department of Agriculture, November, 1958.

RECOMMENDATIONS FOR SELLING

New Hampshire woodland owners who plan to sell stumpage, logs, pulpwood, and other forest products are urged to consider the following recommendations before selling:

1. Find out from buyers of stumpage, logs, pulpwood, and other forest products the prices they offer in order that you may take advantage of the best market. Compare the local prices with those quoted from other sections of the state.
2. Before selling, consult your neighbors who have recently sold timber and use their experience as a guide. Ask your County Forester. In many instances, failure to do this has resulted in the woodland owner not getting full value of the product.
3. Thoroughly investigate all local timber requirements and prices since in many cases local markets pay better prices than outside markets because of the saving of transportation charges.
4. Advertise and secure competition among outside purchasers. The expense will be small and outside buyers will thus learn of chances to bid on timber in competition with local buyers.
5. Secure bids whenever possible, both by the lump sum sale based on closely estimated volume and by log scale measure. A choice is thus offered and a more profitable form of bid can be accepted.
6. Consider the responsibility of the prospective purchaser before making the sale in order to avoid slow payment, costly collections, and losses.
7. When there is quality timber to market, these trees are worth more than the average or poor-quality trees. Be sure the buyer takes the factor of tree quality into consideration when offering you a price for stumpage.
8. Remember that standing timber usually increases in value and generally can be sold at any time. The owner, therefore, is not obliged to place his product on the market, if the price offered is not satisfactory. Sell only trees that should be cut. These trees should be marked by the owner or his agent with the help and advice of a qualified forester. Reliable operators will make partial cuttings by taking only the marked trees, if the owner insists.
9. A written timber sale agreement between buyer and seller is most important before cutting starts on a lot. Sample sale agreement forms to fit different kinds of operations can be obtained from your County Forester.

ASSISTANCE RENDERED BY THE COUNTY FORESTER

The County Forester helps woodland owners to help themselves. Your County Forester will assist you in the examination of your woodlands and make recommendations for managing them. He will help you or your agent in marking trees for cutting in limited amounts, and advise you in the marketing of forest products.

There are thousands of acres of young growing trees, such as pine, spruce, fir, and desirable hardwood, that can be converted into desirable stands of trees, if the overtopping weed trees are cut or killed. It is profitable to prune young, fast-growing, well-formed softwoods, especially white pine with the purpose of growing quality logs that will yield clear lumber. Your County Forester can assist you in getting a forest improvement program started in your woodlands.

Under the provisions of the Agricultural Conservation Program and the Soil Bank Program the Federal Government shares the cost of woodland improvements and tree planting with woodland owners. Tree planting on crop land is especially attractive to the land owner who is not a commercial farmer. The government is interested in renting your crop land for a period of at least ten years, if you are interested in taking it out of production of agricultural crops and planting it to trees. The rental rate is attractive and the government will share 75 percent of the cost of installing the trees, not to exceed \$20 per 1000 Trees planted. Your County Forester can provide you with the information about these cost-sharing programs.

RANGE OF PRICES PAID FOR FOREST PRODUCTS, MARCH 1959

Quality, quantity, location, logging chance, demand, and other factors affect the prices paid for stumpage, logs, pulpwood, piling, poles, fuelwood, and other forest products. The range in prices paid for stumpage and for roadside and mill deliveries is so varied that the prices quoted show an extremely wide range.

TABLES

Table 1. Price Range Standing Timber (stumpage) and Saw Logs per M*

Species	Stumpage	Roadside	Delivered
White Pine Square Edge Quality	\$10 - 30	\$30 - 45	\$35 - 60
White Pine Box Quality	5 - 14	20 - 30	26 - 35
Pitch Pine	12 - 20	25 - 35	30 - 40
Hemlock	8 - 16	24 - 38	32 - 45
Spruce	9 - 25	27 - 40	30 - 50
*Yellow Birch	10 - 35	25 - 55	30 - 80
*White Birch	10 - 23	25 - 43	35 - 70
*Sugar Maple	9 - 30	25 - 55	30 - 65
Soft Maple	7 - 12	20 - 33	35 - 60
*Red Oak	7 - 25	22 - 40	35 - 70
White Oak	10 - 35	30 - 40	35 - 70
Beech	8 - 15	20 - 34	30 - 60
*White Ash	9 - 21	25 - 50	30 - 80
Basswood	10 - 30	28 - 50	33 - 60

* Prices quoted are an average range. Higher prices are paid for stumpage and logs of quality; such as veneer logs, when the market is active and when the material meets special requirement. Read carefully the recommendations for selling on Page 5 before disposing of stumpage, logs, and other forest products.

Table II. Price Range of Fulpwood Per Cord

Species	Stumpage	Roadside	F.O.B.	2/Delivered at Mill
SPRUCE - FIR				
Peeled		\$21.00 - 23.50	Mill delivery	\$26.50 - 28.50
1/Rough	\$2.50 - 6.00	15.00 - 17.00	price less the freight charge	20.50 - 24.00
HEMLOCK - TAMARACK				
Peeled		\$15.00 - 17.50	"	\$20.00 - 22.00
Rough	\$1.00 - \$3.00	10.50 - 11.50	"	16.00 - 18.00
POPLAR				
Peeled		\$12.00 - 15.50		\$19.00 - 21.00
Rough	\$1.00 - 2.00	9.00 - 10.00	"	15.00 - 17.00
3/NORTHERN HARDWOOD				
Peeled		\$16.00 - 18.50	"	\$22.00 - 24.00
Rough	\$1.00 - 3.00	11.00 - 12.00		17.00 - 20.00
PINE				
Peeled		\$14.00 - 15.00	"	\$19.00 - 22.00
Rough	\$1.00 - 2.00	9.00 - 11.00	"	15.00 - 18.00

1/ Lake or stream \$19.00 - \$20.00 per cord

2/ Some mills make price adjustments on delivered wood in relation to trucking distance from roadside pickup to the mill.

3/ Some mills will accept all species of hardwood.

Table III. Price Range of Excelsior Wood, Boltwood, Poles, Piling

Excelsior Wood

Species	Stumpage	Roadside	Delivered at Mill
Poplar	\$1.00 - \$3.00	\$15.00 - \$18.00	\$20.00 - 24.00

Boltwood per Cord

White Birch	\$6.00 -	\$18.00 - 22.00	\$25.00 - 34.00
Yellow Birch	4.00 - 12.00	14.00 - 20.00	23.00 - 32.00
Sugar Maple	4.00 - 12.00		23.00 - 28.00
Beech	3.00 - 5.00		22.00
White Pine	2.00 - 5.00		22.00

Species	Stumpage-per M	Roadside - Per M	Roadside - Per Pole
Norway (red)pine	\$15.00 - 25.00	\$45.00 - 55.00	\$5.00 - 12.00

Specifications

Lengths: 25' 30' 35' 40' 45' 50' 55' 60' 65' 70' & 75' long

Top diameter: Not less than 6" diameter and not more than 10" diameter under bark.

Butts: Not less than 8" diameter and not more than 20" diameter under bark.
Material must be free from short crooks, excessive sweep and rot.
No light between string line laid from center of top to center of butts.
Knots to be trimmed flush to the body of the stick. Material need not be put on brow or skids in some cases.

Construction Poles *

<u>Species</u>	<u>Length</u>	<u>Top Diameter</u>	<u>Delivered Price</u> (per Pole)
Norway (red) pine	10' to 25'	4½' to 6½'	\$.70 - \$3.65

Posts *

<u>Species</u>	<u>Length</u>	<u>Top Diameter</u>	<u>Delivered Price</u> (per post)
Norway (red) pine and Pitch Pine	7'	3½" - 10½"	\$.25 - \$1.05
	8'	4½" - 8½"	\$.40 - .95

Construction Poles: All measurements are inside bark. Must be straight, free from rot and cut to length. Knots to be trimmed flush to the body of the stick.

* Before cutting any posts or poles woodland owners should inquire of buyers concerning current specifications and purchasing program.

Piling

<u>Species</u>	<u>Stumpage</u>	<u>Roadside</u>
Spruce, Norway Pine, and Hardwood)	\$.08 - \$.20 per linear foot \$20.00 - \$60.00 per M	\$20 - \$.30 per linear foot

Specifications: Length 30' and up.
Top diameter 7".

Table IV. Price Range of Fuelwood Per Cord

Species	Stumpage	Roadside	Wood At Retail Yard	Del'd Buyers Premises
Hardwood				
4 ft. wood	.50 - 3.00	\$10.00 - 18.00	\$12.00 - 18.00	\$18.00 - 23.00
12,14,16" lengths*				18.00 - 26.00
Softwood Slabwoods **				
4 ft. lengths		.50 - 6.00		4.00 - 11.00
16" and shorter				8.00 - 18.00
Hardwood Slabwood at mill		2.00 - 10.00		

*\$3.00 - \$5.00 asked for sawing 4 ft. wood into stovewood.
 **Sometimes given away if taken green at sawmill pit.

Formula for determining cords of fuelwood, pulpwood and boltwood.
 Average height in inches. x length of pile in feet = number of cords.

$$\text{Example } \frac{48 \times 8'}{384} = 1 \text{ cord}$$

If wood is longer or shorter than standard length (48") divide standard bolt length to get correct percentage. (Example 39" divided by 48" equals 81%)

Table V. Price Range of Christmas Trees and Boughs

Balsam Fir - Spruce	Stumpage	Roadside	Del. at R.R. Car
Christmas Trees per bundle	\$10 - 1.00	\$2.00 - 4.00	\$2.25 - 3.25
Single trees	.10 - 2.00	.25 - 3.00	
Boughs			
Bundle weight 50 lbs.	.10 - .25	\$.75 - 1.75	
Per ton	\$10.00 - 15.00	40.00 - 60.00	
Boughs for distillation			
Fir, Cedar, Spruce, \$8.00 - \$10.00 per chipped cord. (inquire for specifications)			

Table VI. Operating Costs

Logs	Felling and Bucking Per M	Yarding Per M	Trucking* Per M
Softwood	\$6.00 - \$12.00	\$5.00 - \$12.00	\$4.00 - \$12.00
Hardwood	\$6.00 - \$12.00	\$5.00 - \$13.00	\$5.00 - \$20.00
Pulpwood	per cord	per cord	per cord
Softwood	\$4.50 - \$8.00	\$2.00 - \$6.00	\$3.00 - \$10.00
Hardwood	\$4.50 - \$9.00	\$2.50 - \$7.00	\$4.00 - \$11.00
Twitching stump to roadside (Include Cuttings)	\$6.00 - \$9.00 per cord, horse		
Man with chain saw	\$1.90 - \$4.00 per hour	furnished.	
Stump to stick	\$30.00 - \$40.00 round edge softwood lumber, per M \$35.00 - 55.00 square edge softwood lumber, per M		
Custom Sawing	\$15.00 - \$25.00 per M for softwoods 2.00 - 5.00 more per M for hardwoods		
Planing	5.00 to 15.00 per M		
Horse rental	4.00 per day, including board or \$1.00 - 2.00 per cord		
Chair saw rental	.75 - \$1.50 per cord.		
	.50 - 2.00 per hour.		

*Intra-state and interstate truck rates after used.

LIST OF FOREST PRODUCTS BUYERS *

Names of buyers listed in this bulletin are those who have indicated to the County Foresters that they are in the market now or at a later date to purchase one or more of the following: stumpage, logs, pulpwood, bolts, excelsior wood, piling, posts, and other forest products. Many buyers and operators will give a preference to owners in the purchase of forest products who are interested in harvesting forest products from their holdings in accordance with cutting practices recommended by a County Forester or a private forester. Owners can well consider giving options for further cuts to operators who will make partial cuttings in stands operated according to good forest management.

The following abbreviations are used.

SW -- Softwood	HW -- Hardwood	Stump -- Stumpage
Road -- Roadside	Cus. -- Custom Sawing	Del. -- Delivered at Mill
P -- Portable	S -- Stationary	B. -- Buyer only
		L -- Logger

Names of forest products buyers and other persons listed are offered without recommendations or preference. Omission is not a reflection on the integrity of any person.
