Needs We Respond To...

- Fruit & vegetable production
- Soil testing
- Plant diagnostics
- Pest management
- Farm business management
- Ecologically-sound landscape practices
- Greenhouse crop production
- Food safety for farms & foodservice establishments
- Livestock health & nutrition
- Forage crop production
- Consumer horticulture

What We Do...

- Agriculture and Natural Resource Business Institute
- Pesticide Safety Education Program
- Vegetable and Fruit Twilight Meetings and Workshops
- Dairy Management Conferences
- Cover Crop Demonstrations
- Plant Grower Workshops
- Master Gardener Program
- On-Farm Consultations
- ServSafe Training
- On-Farm Food Safety
- Ask UNH Extension

A Big Impact...

Each year between $1 and 1.5 million is saved by vegetable and fruit growers using integrated pest management practices recommended by UNH Cooperative Extension. Important benefits of this work are reduced exposure of pesticides to humans, wildlife, soil and water.
