

Best Management Practices for Forestry: Protecting New Hampshire's Water Quality

This handbook describes Best Management Practices, or BMPs, for protecting water quality during forest harvests. The BMPs include a wide range of recommended techniques that can be used before, during, and after logging operations. Loggers, foresters, and scientists have developed these techniques from their own practical experience and research.

This document was adapted with permission from the Maine Department of Conservation's Maine Forest Service publication, "Best Management Practices for Forestry: Protecting Maine's Water Quality". Reviewers included the New Hampshire Division of Forests and Lands, New Hampshire Department of Environmental Services, New Hampshire Timberland Owners Association, and New Hampshire Timber Harvesting Council.

Funding for the printing of this document was provided by: UNH Cooperative Extension, USDA Forest Service, State and Private Forestry, and the NH Sustainable Forestry Committee.
