Extension

Join us for a hands-on session in the field and learn about the importance of scouting corn fields for pests mid-season. We will cover common weed and insect pests, proper scouting techniques and timing, assessing crop injury, post emergence herbicide programs for mid-season weed management, and options for managing insect pests. We will also discuss mid-season nitrogen checks for corn.

For persons with disabilities requiring special accommodations, please contact Carl Majewski 603-352-4550 prior to the event. Given ample time, we will make any reasonable effort to make accommodations.

The University of New Hampshire Cooperative Extension is an equal opportunity educator and employer. University of New Hampshire, U.S. Department of Agriculture and NH counties cooperating.
