

Guidelines for 4-H Clothing Construction Projects

The 4-H clothing construction program enables youth to develop the competencies, knowledge and skills necessary to create clothing they enjoy wearing. 4-H members can progress through skill levels at their own rate. In the Clothing and Textiles project, youth gain consumer skills in making, purchasing and caring for clothing and accessories. 4-H members can choose to sew for personal pleasure, to exhibit garments or accessories at fairs, to participate in Fashion Revue or judging events, to take part in field trips and tours, and to sew items for community service projects. The project can be taken independently, as part of a 4-H club, or as a family unit. Older, more experienced 4-H members in this project can serve as junior/teen leaders, helping plan programs and teaching others.
