

A Landowner's Guide to Inventorying and Monitoring Wildlife in New Hampshire

Introducing a publication to help you better know and understand the wildlife on your land.

If you are a New Hampshire landowner and curious about the wildlife on your land, this book is for you.

This book includes:

- Tips for observing wildlife
- How to keep records of wildlife observations
- Guidance on creating a habitat map of your property – what to look for, and how to map it
- Detailed how-to descriptions of wildlife inventory methods, including birds, mammals, amphibians & reptiles, and insects.
- Data tabulations sheets for each inventory method
- Descriptions and contact information for national and statewide wildlife monitoring programs where you can contribute to larger studies of wildlife populations

Written by Malin Ely Clyde, Darrel Covell and Matt Tarr of UNH Cooperative Extension, it may be purchased through the UNH Cooperative Extension Forestry Information Center.
