

Tips for Editing Your 4-H Videos and Presentations OpenShot Video Editor Tutorial

This is a quick tutorial on how to edit your 4-H video or recorded presentation using <u>OpenShot</u> video editing software. In it you will learn how to import video clips, arrange them on a timeline, trim and edit them to remove unwanted video, and add titles.

Why edit my video?

Editing a video allows you to crop out mistakes and connect several shorter video clips to make a final video neater and make a better, clearer video presentation.

Getting started

There are several kinds of video editing software out there. This tutorial uses <u>OpenShot</u>, a free open source program that can be used on Mac, PC or Linux computers.

Download the software – go to the OpenShot webpage <u>https://www.openshot.org/</u> and click on the download button.

Download v2.5.1 🙏 💣 🛒

Follow the downloading directions.

Here's what the OpenShot 'workspace' will look like:

The University of New Hampshire Cooperative Extension is an equal opportunity educator and employer.UNH, U.S. Dept. of Agriculture, and New Hampshire counties cooperating.Claes Thelemarck, UNH Extension 4/28/20201/3

Importing Video Clips

Video clips can be dragged from your video folder into the Project Files pane:

or by clicking the Green + and selecting files to import.

Adding Video to the Timeline

Drag video clips from the Project Files pane onto the Timeline at the bottom of the workspace

Hint: If you want to slice a section in the middle, move to the beginning of the piece you want to cut out and <u>Slice</u> and <u>Keep Both Sides</u>. Then move to the end of the piece and <u>Slice</u> and <u>Keep Right Side</u>.

Adding a Title

You can add a title by clicking "Title" from the menu in the upper left corner of your screen. Then choose a template from the options given. You will be able to edit the image and change the text to suit your needs.

Exporting Your Video to a Final Format

When you are ready to export your video into a usable format like an .MP4 file, click the red dot in the upper left of the screen. Then follow directions for saving your video.
